BLAZING A REVOLUTION IN DIGITAL PINBALL

Authenticity Without Maintenance

PINFERNO's construction honours every detail of machines from the past: cabinet dimensions, button position, authentic legs & lockdown bar, and tempered glass.

You get the look, feel, and strength of a commercial machine, built to last. Gameplay is smooth thanks to competition-grade flipper buttons and a dedicated graphics processor.

23-in-1 for Endless Entertainment

PINFERNO comes with 23 digital tables - for home or commercial use - created by enthusiasts of the pinball community from around the world.

Rich Multimedia Experience

Premium models include a 40" playfield, 27" backglass, and 14" dot matrix display (DMD). Additionally, a camera tracks your body position to generate a 3-D playfield. A 50-watt 2.1 sound system paired with force feedback is so realistic you can "feel" the flippers.

Make It Yours, and Make Memories

Instructions are included to add 1500+ tables. Even better, the software allows you to build your own table; be it a re-creation of your favourite, or your own original masterpiece.

To truly personalize PINFERNO, you can build your own through our kits. You'll only need basic tools, and the experience will last forever.
